

R-610

MANUAL ENGINEERED HARDWOOD FLOORING NAILER

The Primatech R-610 is specifically designed for the installation of thin engineered hardwood flooring. It offers low cost alternative to adhesive when surfaces are suitable for nail down applications. Job time is saved by eliminating adhesive set-up times and troweling. Nail down allows traffic on the new floor immediately after installation. "QUICK-LOCK" system provides split-second adjustment to various profiles. Nailer base shoe features a built-in tapping block that contacts and pushes against the tongue thus eliminating pounding and damage done to top edge of thin flooring. Aluminum construction allows for lightweight and durability.

Features

- lightweight for improved maneuverability
- large composite base to increase stability
- built-in tapping block
- QUICK-LOCK, universal adjustment handles
- quick loading magazine with spring loaded nail pusher
- ergonomic, comfort grip handle
- quick and easy access for maintenance
- 20 oz (0.5 kg) aluminum mallet

Applications

- Accommodates 5/16" to 1/2" (8 mm to 13 mm) engineered hardwood flooring

Tool Specifications

WEIGHT: 6.8 lbs (3.09 kg)
 HEIGHT: 17 3/4" (451 mm)
 LENGTH: 12 1/2" (320 mm)
 CAPACITY: 300 nails

Fasteners Specifications

L CLEATS, 22 gage
 1 1/4" (32 mm)

Cleat nails minimize wood splitting and still allow for expansion and contraction of flooring material.
